Summary

Frontend Developer with 4+ years of experience building user-facing features with React and Angular. Strong foundation in web performance, UI/UX design, and scalable architecture. Proven track record of delivering high-quality interfaces optimized for cross-browser compatibility and fast load times. Passionate about clean, modular code and enhancing user experience.

Recent Experiences

SR. SOFTWARE DEVELOPER & Reporting Manager

04/2024 to Current

Tech Mahindra – Noida

Project: Samsung TV Plugin for Food Application

- Delivered a hybrid Samsung TV plugin (Angular + SCSS) **2 weeks ahead of schedule**, reducing load times by 50%.
- **Led junior developers** by managing daily reporting tasks like attendance tracking, mentoring new joiners, and ensuring smooth project coordination.
- Developed Samsung-specific TV plugin features using custom winset libraries, optimizing for seamless device integrations.
- Actively collaborated with backend engineers and QA teams to deliver polished releases with 98% first-pass success.
- Conducted code reviews to maintain high-quality coding standards and introduced best practices across the team.
- Built reusable UI components using Angular and SCSS for Samsung's WebOS-based applications.
- Created responsive, pixel-perfect designs ensuring compatibility across 20+ Samsung TV models.
- Implemented secure API integrations with Node.js backend and enhanced performance by 30% through lazy loading and optimization.
- Worked closely with clients to translate business requirements into technical solutions.

Skills

- **Languages & Markup:** HTML5, CSS3, JavaScript (ES6+), TypeScript

- **Frameworks & Libraries:** React 18+, Angular 16+, Knockout.js, jQuery
- **Styling Tools:** Tailwind CSS, SCSS, Less
- **API Integration:** RESTful APIs, GraphQL
- **Performance & UX:** Lazy loading, responsive design, accessibility, cross-browser support
- **Version Control & Tools:** Git, GitHub, Postman, Vite, Webpack
- **UI/UX:** Figma, Adobe XD
- **Testing:** Jest
- **Soft Skills:** Team collaboration, problem-solving, mentoring

Education

Specialization: Specialization in Full Stack Development

03/2024

EICT Academy, IIT Roorkee

- My ePortfolio => https://olympus.mygreatlearning.com/eportfolio?pb_id=14229

B.Tech: Computer Science

09/2021

JSS Academy Of Technical Education - Noida Sec-62

- Bachelor of Technology (B.Tech) in Computer Science (2017 – 2021)

Recent Projects

- **Samsung TV Plugin (Angular + SCSS)**

Developed a hybrid plugin tailored for Samsung TV platforms using Angular. Reduced load times by 50%, boosting engagement and delivering ahead of schedule.

- **Job Portal App- Just like Naukri :** Recruiter and Job Seeker roles, Resume uploads, job application tracking, Email notifications, password reset, Admin panel for moderation

- **AniX — Open Source Animation Library:** AniX is a modern, lightweight animation library built for developers working with **HTML/CSS/JS, React**, and **Angular**. It provides **production-ready UI animations** – from button hover effects to full-page transitions – all in a clean, dev-friendly format.
